RE: Summary of Examiner Telephone Interview on  
December 6, 2006.

Sir:

An interview with Examiner McNally on 6 December 2006 discussed the Trager reference in detail. Applicant argued that the Trager reference requires the stitching of the pattern to the backing whereas applicant's method merely stitches an outline of the pattern on the backing. The Examiner argued that the drawings do not clearly show this method. Applicant agreed to file a continuation application with corrected drawings.
